

Poster Presentations in Gather.Town

Adapted from: Carleton Cognitive Science Graduate Conference 2021, thank you internet!

The following lists the required and optional documents to submit for poster presenters and includes instructions on how to format these documents.

Please submit questions, comments, or concerns regarding poster submissions or other conference related inquiries to the following email address: 2021vasg@gmail.com.

Presenting in Gather.Town

Some of the conference will take place in Gather.Town. There will be two specific rooms where posters will be presented. You will need to submit your poster before the conference, and it will then be set up in Gather.Town for you. When your poster session is scheduled, you should stand in the shaded square in front of your poster. This shaded square is known as a “private space” and your audio/video will be shared with everyone else in this square, but not neighboring spaces. See Figure 1 for an example.

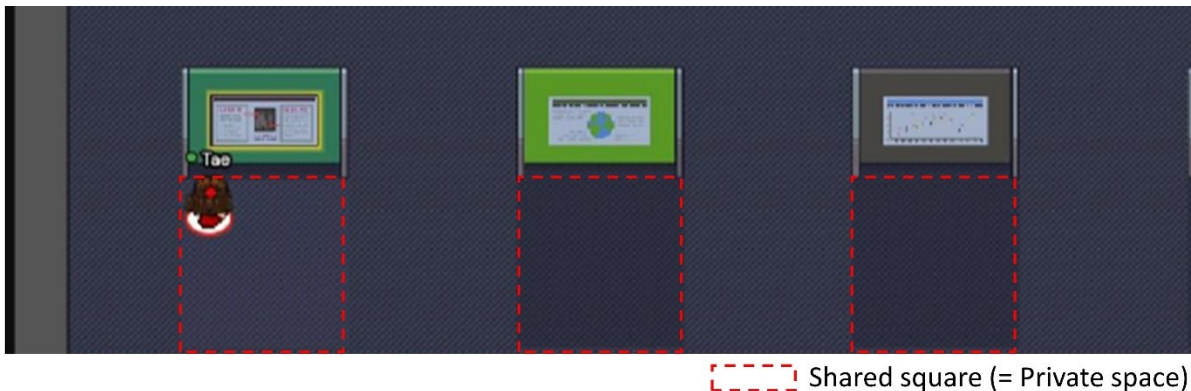

Figure 1: The red dotted line box represents a “shared square” or “private space” where audio/video interactions are enabled.

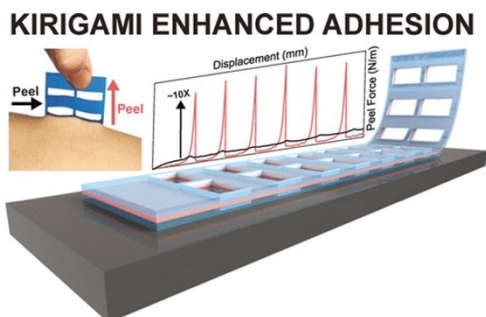

Documents for Poster Submission:

The following 3 items must be submitted to this Google Form link: <https://forms.gle/qf2qKqMogXq4tac19> by Friday, September 17th. If you have any problems with formatting the required document, please do not hesitate to contact us for assistance.

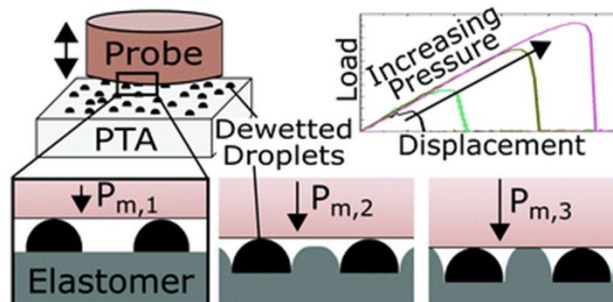

1. **One sentence summary** in TXT format,
 - Please write down your research summary in one sentence in the Google Form.
[Example 1]: Kirigami cut patterns in adhesives enhance adhesion.
[Example 2]: A pressure tunable adhesive (PTA) is fabricated via thin film dewetting to obtain stiff asperities on a soft substrate, enabling it to achieve multiple adhesion energy states depending on the applied pressure
2. **Graphical summary** in JPG or PNG format (Optional),
 - Although it is optional, we highly encourage poster presenters to submit a graphical summary. This image and one sentence summary will be included in a program that will be shared with all attendees to help them follow along with the poster session (Note that a textual abstract will be not submitted in this gathering). We believe that this is a

beneficial opportunity to showcase your work in a very brief summary to clearly communicate a key message with the audience and to attract them to your poster!

- The format should be a ToC (Table of Contents) style – Refer to journals such as Soft Matter and ACS Applied Materials & Interfaces to see examples of ToC figures. They are usually found right below or alongside the abstract.

Example 1

Example 2

Figure 2. Each example of graphical summary which corresponds to the one sentence summary.

3. **Poster** in JPG or PNG format,

- This is what the participants will see when interacting with your poster presentation. See Figure 3 for an example.
- See instructions below on how to make posters and resize images.

1. We recommend using PowerPoint.
2. Select the Design tab
3. Select the Slide Size icon and choose Custom Slide Size from the drop down
4. Change width to 27cm and Height to 16cm. (Maximum size: 3MB)
5. A pop-up will appear prompting you to make a selection. Choose Ensure Fit.
6. File > Save. Name appropriately and save as JPG.

[File name]: Last name, only first author – Initials of institution – Initials of current position (Graduate Student – GS, Postdoctoral Researcher – PR, Professor – PF, Industrial Scientist - IS)

[Example]: Hwang – VT – GS

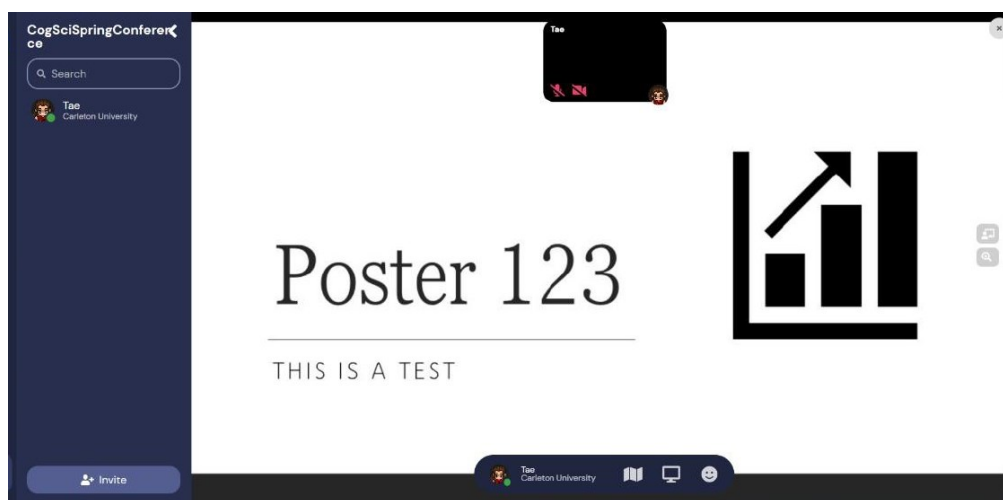

Figure 3: This is the view after interacting with a poster (by pressing x).
